	You have a Biblical understanding of why this discipline is important and how it helps you in knowing God.	You know how to practically apply this discipline.	You have applied this discipline at least once but it still isn't a consistent practice in your life.	The discipline is consistently practiced in your life and has become a lifestyle.	You have reproduced this discipline into the life of another. (They know why to practice the discipline, how to practice the discipline; They have gotten started in the discipline and are now consistent in the discipline; They are now reproducing the discipline into the life of another.)
